

**AMENDMENTS TO THE SPECIFICATION**

Please replace the paragraph in the specification at page 4, lines 21-24, with the following paragraph:

The central portion 22 has a central axial pass-through hole 23 and, at a first end of the central portion 22, a first base collar ~~[[24]]~~ 30 and, at a second end of the central portion 22, a second base collar 40.

Please replace the paragraph in the specification at page 6, lines 2-5, with the following paragraph:

The first internal base surface 42 is preferably connected to the internal side surface 44 by means of a relief 46, and the internal side surface 44 is also connected to the second outer base surface 45 by a bevel 48.

Please replace the paragraph in the specification at page 7, lines 20-23 with the following paragraph:

The point 80 is obtained by the intersection of an axis 82 of the slot of the middle side section of the disk 20, shown in figure 8, with the extension of the side surface 29.
